J.H. Huscroft Ltd. has been a family owned and operated business since 1927.

We produce mainly 1" boards in Englemann Spruce/Lodgepole Pine (ESLP) and also in Douglas Fir/Larch (DF/L). We also produce 2" dimension lumber in Spruce Pine Fir (SPF) and DF/L.

As a mid sized company we produce many specialty products such as laminating stock, timbers, ties, export sizes, rougher head 7/8" lumber and select fencing with bar coding. In a joint venture with the Lower Kootenay Band we operate a remanufacturing facility which produces moulded and end matched products. "V" end match, flush end match and microbevel end match are available. In addition to the standard patterns illustrated your individual pattern can be made if you provide us with your profile.

Why should you buy from our company?

Consistent low moisture content between 10-12% on all our boards which is achieved by air drying our lumber for many weeks prior to drying at a low temperature. This provides a uniformly dry product that enables us to put an excellent surface on both S4S and moulded boards.

Excellent surfacing Our planer and moulder are operated by certified professional planermen who are skilled and experienced and take pride in producing a great product with an excellent surface.

Species Specific Pattern Stock Our moulded stock is Lodgepole Pine, Spruce, Douglas Fir and Larch. For specific applications we can guarantee a single species.

Specialty Services Our sawmill and moulder operations are flexible enough that we can manufacture large timbers to minor bundles of 1 x 2. We do online bar coding, bundles with end caps, small units, and specialty packaging. Ask us and we will be pleased to meet your individual needs.

On-time delivery of quality products

J.H. Huscroft Ltd. has skilled and dedicated employees who are proud of our reputation for quality, integrity, and on time delivery. We deliver what we promise.
